# BUFFALO BILL.

A NOTED MAN'S OPINION ON A SUBJECT OF VITAL IMPORTANCE.

He speaks from experience. His life, his knowledge of the Indians and his unimpeachable integrity lend weight to his statements.

LONDON WATER SUPPLY.

It is estimated, says the Standard, that the whole of Greater London, covering an area of about 600 miles, is supplied by three constabularies, whose powers and districts are defined by law.

The St. Thomas constabulary are allowed to draw a maximum supply of 120,000,000 gallons a day; the East London constabulary, 100,000,000; and the New River 25,000,000 gallons a day from the Lea; the rest coming from the other two.

It is interesting to note that there is, however, a supplementary supply derived by several companies from the gravel beds by the side of the Thames, and in their case the water is treated naturally.

It is thought that the water of the London supply was required every day for the supply of the city, for drinking, domestic and trade purposes.

It is also interesting to note that there is an enormous expenditure of force for the purpose of maintaining the water supply, which is estimated at 120,000,000 gallons every day.

It is also interesting to note that there is an enormous expenditure of force for the purpose of maintaining the water supply, which is estimated at 120,000,000 gallons every day.

# VAN GELDT'S CHRISTMAS

It might be thought that Father Christmas was a good deal of an abolitionist in 17th century, as much out of place as a general in the 18th century. But when we look at the story of the old man, we find that he is a very different person from the one we know today.
