## LEON LAKE OUTING.

Many Northwestern Newspaper Men took a Trip to Leach Lake and the Minnesota Pine Forests For the First Time.

The third annual outing of the Northwestern Editorial Association occurred last Saturday, the objective point being Walker. The party had intended passing through this city on Friday afternoon, but the severe wind and rain storm of Thursday which caused washouts on nearly all the railroads in this section delayed the party on Friday they were taken to Glenwood in a special coach in charge of Assistant Passenger Agent Craig of the Northern Pacific. On Saturday afternoon the party arrived in Brainerd, and at 5 o'clock left for the Brainerd & Northern Minnesota road for Walker, arriving there at 10 o'clock. The party was met at the depot by the entire population of that enterprising village. Supper was served at the Pinedale Hotel, and a social dance followed, music being furnished by Dressell's orchestra of this city. On Sunday a large number of the excursionists visited the Leach Lake reservation and many of them listened to a sermon in the Chippewa language delivered by Rev. Chas. Wright, at the little Indian church. Mr. Wright is a full blood Indian and was educated in a boarding school at the University of Wisconsin. The balance of the stay in Walker was most pleasantly spent and although some minor interferences with the plans were caused to adapt themselves to circumstances and not a moment dragged.

The banquet which centered at the Pinedale was an elaborate affair and thoroughly enjoyed. A. G. Bernard, secretary of the association presided, and President Chas. S. Mitchell made an eloquent response in behalf of the editorial fraternity. Addresses were listened to by C. F. McDonald, G. S. Pease, Hon. B. F. Hartshorn, H. M. Wheelock, E. R. Adams. Another pleasant feature of the evening and the morning following was the music furnished by Miss Mitchell and Robinson and Messrs. Alderman and Webb of this city and the quartette were the recipients of prolonged applause after each rendition. The banquet was printed in Chippewa as follows:

At 10 o'clock Monday morning the party left on the return trip and arrived in Brainerd at 10:30, the party having been given a chance to see the steam hoists at work taking logs from the lake and loading them on cars on the down trip.

Among those who attended the outing party from Brainerd were Mr. and Mrs. S. F. Alderman, Mr. and Mrs. E. O. Webb, Mr. and Mrs. E. H. Hoar, Mr. and Mrs. N. E. Engstrom, Mrs. F. W. Wisland, W. P. ## Two Conventions.

The populists held their county convention at the court house on Tuesday evening and elected delegates to the congressional and state conventions. The democratic convention called for the purpose of electing delegates to the state and congressional conventions was called to order yesterday afternoon. Robert Mages was chosen chairman and L. H. Stallman secretary. A committee on credentials consisting of H. C. Stivers, Jerome Kelleher and Wm. Paine, Sr. was appointed and the following delegates were reported as entitled to seats in the convention:

## SUPT. CARLETON WILL RESIGN.

Charge of Bribery Against Supt. Carleton Dismissed in the Municipal Court on Monday.

ON CONDITION THAT HE RESIGN. No Testimony Given, An Agreement Being Reached Before Court Convened.

On Monday afternoon in the municipal court the case of the State of Minnesota against Prof. M. H. Carleton, charged with attempted bribery was disposed of, the defendant being discharged on motion of the county attorney. Defendant had employed eminent counsel in the person of C. D. O'Brien of St. Paul. Previous to the opening of court Mr. O'Brien representing Mr. Carleton called on County Attorney Fleming and made a proposition that if the case against Mr. Carleton be dismissed he would resign as superintendent of schools. Mr. Fleming at the urgent solicitation of the prosecuting committee, who are desirous to see the schools of the profession, and also to prevent further demoralization of the schools by bringing the case to trial, consented to this arrangement. When the case was called Mr. Fleming addressed the court and urged the motion to dismiss the case for the purpose of electing delegates to the state and congressional conventions stated above, but with the express understanding also that he would bring the matter before the grand jury at the next term of court. Mr. O'Brien then briefly addressed the court stating that Mr. Carleton had taken the above steps because he had long since concluded to resign and leave, and because of the injury to the schools and airing of the case would be a trial was held. That those reasons stated above, but with the express understanding also that he would bring the matter before the grand jury at the next term of court. Mr. O'Brien then briefly addressed the court stating that Mr. Carleton had long since concluded to resign and leave, and because of the injury to the schools and airing of the case would be a trial was held. That those reasons stated above, but with the express understanding also that he would bring the matter before the grand jury at the next term of court.

This is, we hope, the end of the trouble that has disturbed our schools for more than a year past, and is probably the best solution of the difficulty. Mr. Carleton did not send in his resignation at the regular meeting of the board last night, but will probably, do so in the near future.

Lock Out for Grasshoppers.

The Northern Pacific Co. has posted up in its ticket offices at all the local stations circulars regarding the threatened invasion by grasshoppers, giving directions for the extermination of the pest, to be followed by pictures and illustrations.

As the destructive Rocky Mountain Locust is again leaving its native home and is moving eastward there is danger of an invasion, hence the circulars. Past experience has shown that we must be well prepared to commence a successful war. At present only a few places in North and South Dakota are infested with this pest, and but little fear need be entertained on their account, but more and larger swarms will be the consequence if

A. L. HOFFMAN & CO.

the grasshoppers now found in our fields are neglected and permitted to multiply. An ounce of prevention is worth a pound of cure.

The best remedy is to destroy the eggs, or to prevent their hatching. This can only be done by plowing all land containing eggs during autumn and early in spring, hence it is to late now to apply this remedy.

Plowing. If the young locusts are scattered over a field, and if the crops are too much injured to be plowed. A number of plows should be used at the same time, the plows following each other as closely as possible. By commencing the operation at the outer edge of a field where they are crowded together they will be killed more effectively.

Poisoning. If the young locusts are still feeding in regular armies side by side the plants in front of them should be dusted with Paris green or London purple, this will kill most of them.

To protect our plants in gardens and fields from which chickens and cattle can be kept away, we can use play with excellent results built made of bran-mash of Paris green.

### Sympathetic husbands.

The sympathetic tenderness of a loving husband is everything to an expectant mother, especially during her last ordeal. George Layton, who is prominent amongst the doctors of Dayton, O., gives the following case:

My patient, Mrs. M., whose wife has had four babies of "Mother's Friend" before me, says, "After using the effects of this agent, and there were but four babies on the way, I got one more, and it was just as good as the others."

"Mother's Friend" is a scientifically compounded liniment which affords certain relief in the various ailments prevailing during pregnancy, and also in the care of children, and affords proper elasticity to the cord, and renders it easy in the final ordeal.

"Mother's Friend" is sold by druggists, or expressed on receipt of one dollar.

### The Tent Caterpillar.

We have been informed of what is said to be now the only practicable way of checking the ravages of the tent-caterpillar, and at least on our lawns we may hope to make it effective, as the plan has been tried with good effect in St. Cloud and other places. A sheet of cotton hanging in the tent in cheap form around a tree that caterpillars have not yet attacked, fastening the upper and lower ends of the cone so tightly around the tree that the worms cannot crawl through. They attack trees usually by crawling up from the roof and when the cotton comes in contact with them they will not turn back. When they fly it they can only be destroyed, and a tree on which there were no nests may be saved. The plan is certainly worth a trial.—Anoka Herald.

The following case was published in the Boston Herald, a newspaper published at Boston, Oct. 10, 1892. It is a very rare case and the original statement has been completely revised.

Doctor said the disease was not serious, and that he would not die. The Canadian Association, after a thorough examination, pronounced him a favorable case. The doctor was in a hurry to get away from the hospital.

His iron strength is shaken, but it still holds out. They are drifting seaward and seaward to the open sea. He can launch the boat without help; he can take the food and the fuel with him. The sleeper on the iceberg is the man who has robbed him of Clara. The shadow of the deadly thought grows and darkens over his face. He waits with his hands on the boat-walls and thinks.

So the tempter whispers. Richard Wardour tries his strength on the boat. He moves; he has got it under control. It stops, and looks around. Richard Wardour is the man who has robbed him of Clara. In a villa on the westward shore of the Isle of Wight the glass door which lead from the drawing room to the garden was just open. The faded lamp jets burn on the table. A lady sits by the lamp reading. From time to time she looks out into the garden and sees the white-robed figure of a young girl in the garden.
